- December 31, 2019 – First confirmed case of COVID-19 in Wuhan, China.

SHELTER-IN-PLACE ORDER

Shelter-in-Place Order for Monterey County reissued with added restrictions effective at 12:01 a.m. on May 4, 2020 and will continue to be in **effect until 11:59 p.m. on May 31, 2020, or until it is extended, rescinded, superseded, or amended** in writing by the Health Officer. For more information.

Monterey County Health Officer Dr. Edward Moreno today issued a supplement to the current Shelter-in-Place Order allowing local businesses to conduct limited re-openings as Gov. Gavin Newsom launches Stage 2 of his Reopening Roadmap.

Beginning Friday, May 8, 2020, local retail businesses may begin providing curbside pick-up services to customers. Examples of such businesses include bookstores, clothing stores, florists, sporting goods stores and other over-the-counter retailers. In addition, manufacturing and supply chain workplaces supporting these businesses may open. Social Distancing Protocols must be followed in all of these settings. Members of the public may place orders online or via telephone only. Retailers are not allowed to display merchandise on sidewalks.

More [information](#).

FACE COVERINGS

To help stop the spread of COVID-19, the Monterey County Health Officer is requiring residents to wear a face covering when going out into the public to perform essential activities, effective 12:01 a.m. on Thursday, April 30, 2020. Combined with sheltering in place, social distancing, and frequent hand hygiene, facial coverings are shown to help slow transmission of COVID-19.

These changes reflect the serious nature of the evolving COVID-19 pandemic and increased understanding about how the virus spreads. We now know from recent studies that people infected with COVID-19 can transmit the virus to others before showing symptoms or without ever showing symptoms.

COVID-19 is spread through respiratory droplets that are produced when an infected person coughs, sneezes or talks. These droplets can land in the mouths or noses of others who are nearby. When properly worn by the user, facial coverings have the potential to slow the spread of the virus by reducing the release of these droplets into the air. Even a small reduction in community transmission could make a major difference to the demand on the healthcare system.

Businesses must take reasonable measures, such as posting signs, to remind patrons about face coverings, and may not serve customers who do not observe the order. Workers do not need to wear face coverings if they are alone in a personal office but must put them on when others are present.

The order also includes customers of public transit (including while waiting at transit stops), rideshare services, and passengers in private automobiles who are not members of the same household.

The order does not require children 12 and younger to wear face coverings or anyone who has trouble breathing or is unconscious, incapacitated, or otherwise unable to remove the mask without assistance. Children two years old or younger must not wear them due to risk of suffocation.

The California Department of Public Health has these guidelines for cloth masks/face coverings:

- Face coverings can be made from cloth, be factory-made or hand-sewn, or improvised using bandannas, scarves, T-shirts, sweatshirts or towels.
- The material should cover the nose and mouth.
- Ideally, face coverings should be washed after each use. Dirty masks should be placed in a dedicated laundry bag or bin.
- Use detergent and hot water when washing cloth masks and dry them on a hot cycle.
- Be sure your mask is comfortable; you don't want to have to keep adjusting the mask because that means touching your face.
- Wash your hands, or use hand sanitizer, before and after touching your face or face coverings.

- If you must re-wear your cloth face covering before washing it, wash your hands immediately after putting it back on and avoid touching your face.

For guides on homemade face coverings, please see <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/diy-cloth-face-coverings.html>

STATUS OF COUNTY GOVERNMENT

Two months ago, everything changed and it's changing again. Our county and the state are looking at how to safely inch our lives closer to a kind of normalcy. This is only possible because so many of you have stayed home and saved lives. You've heard about how Monterey County is slowly moving into Phase 2 recovery and reopening. There are many who want to go faster and many who want to go more slowly. No matter where you stand, whatever activities you decide to embark on with the eased restrictions now in place, please do them safely.

There is more access to low-risk activities now than in the last two months – more things we can do and enjoy. We can walk along the beach. Stores have curbside service. Summer camps for kids have the 'green light' with restrictions. While all this is good news, don't forget what started it all. COVID-19 has not gone away – it is still a serious threat. We each must consider the risks to ourselves and our families when choosing to have more interactions.

Thank you for flattening and continuing to flatten the curve of this virus. It is working! The more we know about COVID-19 in

our community the safer we all are. If you haven't yet, consider getting a test at one of our area's free OptumServe sites. [More information.](#)

STATUS OF THE STATE

Californians have been staying home and saving lives since the start of our statewide stay-at-home order issued on March 19,

2020. These efforts have allowed the state to move forward on our roadmap for modifying the statewide order.

We are now in early Stage 2, where retail (curbside and delivery only), related logistics and manufacturing and essential businesses can open. The state is issuing guidance to help these workplaces reopen safely. [More Information.](#)
